TITLE	Utilization of Residence Hall Facilities, Fall 1987, with Trends from Fall 1978. Report No. 9-88.
INSTITUTION	State Univ. of New York, Albany. Office of Institutional Research and Planning.
PUB DATE	May 88
NOTE	109p.
AVAILABLE FROM	Office of Institutional Research and Planning, State University of New York, State University Plaza, Albany, NY 12246.
PUB TYPE	Statistical Data (110)
EDRS PRICE	MF01/PC05 Plus Postage.
DESCRIPTORS	*College Housing; *Dormitories; Evaluation; Financial Needs; Higher Education; Income; Needs Assessment; On Campus Students; Place of Residence; Policy; *Residence Requirements; Resident Assistants; Residential Colleges; State Surveys
IDENTIFIERS	*New York

ABSTRACT

Detailed data collected on the utilization of residence hall facilities during the fall of 1987 (for the 14th annual survey) are provided. Also included are summary data for fall 1978 through fall 1987. All state-operated/funded institutions which have residence hall facilities are included in the study. The methodology used in the study was developed to be consistent with the University Guidelines for Utilization of Residence Hall Facilities and the State University of New York Policies and Procedures manual. A general policy change occurred in university management of residence halls between 1985 and 1986, with one manifestation being the restructuring of dormitory fiscal operations into a Dormitory Income Fund Reimbursable structure. Seven tables of data for the fall of 1987 include utilization of original design capacity of residence hall facilities, utilization by institution within institution type, student occupancy of net revenue producing adjusted design capacity, revenue-producing other utilization and percent of revenue generated, and resident assistant bed rental waivers in residence hall facilities. Six tables on trends for fall 1978 through fall 1987 include total utilization of net revenue producing adjusted design capacity, trends in percent utilization for each institution, non-revenue assignments in residence hall facilities, and number of students per resident assistant. Definitions are provided for terms used in the study. A Central Staff Office of Institutional Research publications list is included. (SM)

PREFACE

This report on Utilization of Residence Hall Facilities consists of detailed data collected for the fourteenth annual survey which was conducted during the Fall of 1987. The report also contains summary data for Fall 1978 through Fall 1987. Detailed tables for Fall 1974 through Fall 1986 inclusive, are available in earlier reports published by this office (see Publications List, page 54). Details regarding the residence hall program are important in the planning and budgetary functions of each institution. While the survey was specifically designed to meet the data requirements of the State University Central Administration Offices of Institutional Research and Planning, Finance and Business and Educational Services, requests for these data have subsequently come from many sectors both inside and outside of the State University.

The study includes all State-operated/funded institutions which have residence hall facilities. A listing of these institutions, organized by institution type, can be found on page vi; reference to institution type in this publication, therefore, includes only those institutions listed. Residence hall facilities available at locally sponsored Community Colleges under the program of the State University of New York are financed in a different manner and are not included in the study.

Graphic displays of percent utilization of residence hall facilities are again included in this publication. Trend data are displayed for each institution, as well as Fall 1987 utilization by institution within institution type.

A study of this complexity could not have been completed without the full cooperation of the institutional respondents and other Central Staff Offices. We also thank our office manager, Mr. Paul Ferguson, our statistical staff, Mr. Roy Spoor and Ms. Susan Wendover, as well as our secretarial staff, Ms. Peg Rings, who prepared the final transcript and distributed all copies of the publication.

INTRODUCTION

The methodology and definitions used in this study have been developed to be consistent with the University Guidelines for Utilization of Residence Hall Facilities and the State University of New York Policies and Procedures Manual. Definitions of the basic concepts used in this report are provided beginning on page xi.

A general policy change occurred in University management of residence halls between 1985 and 1986. One manifestation of the change is the restructuring of dormitory fiscal operations into a Dormitory Income Fund Reimbursable (DIFR) structure. Accompanying this new structure is a series of alterations in rate setting and revenue generation:

1. The concept of a single University-wide standard double room rate has been replaced by the acceptance of institution-specific standard double room rates, which must fall within a specified range of the average of standard double room rates for all of the State-operated/funded institutions of the State University of New York.

2. The ratio of superior and reduced rates to the standard double rate is now at the discretion of each institution, pending approval from Central Administration.

3. The algorithm to calculate the number of allowable Resident Assistant waivers has been greatly simplified. The RA factor concept has been discontinued, and an acceptable range of RA waivers from 4% to 6% of resident student occupancy (headcount) is now in effect.

4. It is now permissible to place lodgings into an inactive status under certain conditions.

For information about the new policy, refer to the Dormitory Income Fund Reimbursable (DIFR) Guidelines published in November 1986 by the State University of New York Office of Finance and Business.

Three tables have been designed to provide supporting information to evaluate the effect of these policy initiatives on the utilization of residence halls. Table 5, Utilization of Net Revenue Producing Adjusted Design Capacity by Rate, shows the schedule of rates developed by each institution as of Fall 1987, as well as the occupancy of facilities at each rate. Tables 6 and 7, which deal with Resident Assistant Bed Rental Waivers, show the accepted range of bed rental waivers. Increased variability in amount of Resident Assistant Waivers (i.e. .66, .4, .74) has resulted in the necessity to report the more unusual waivers in terms of ranges rather than by actual waiver portion.

The report contains seven tables of data for Fall 1987:

Table 1 presents aggregated data which describes the original capacity of the residence hall facilities, the permanent and temporary adjustments to this original capacity, net available space and percent of actual utilization.

Table 2 provides more detailed data concerning the types of utilization of net available space depicted in Table 1. Resident student utilization as well as other types of utilization are arrayed in categories, as described in the column headings.

Table 3 focuses on resident student utilization summarized on Table 2. Data are arrayed by institution, type of accommodation and rate paid by the students.

Table 4 describes revenue-producing utilization of residence halls for other than student occupancy. Net utilization of each campus is arrayed with "other uses" data to clarify the relationship between amount of space available and "other" revenue-generating effort. "Other uses" data are arrayed within each category by bedcount, headcount, and percent of revenue generated.

Table 5, arrays the utilization of net revenue producing adjusted design capacity by rate. For each institution, revenue-producing utilization is shown in total, then detailed--along with the associated rates charged in Fall 1987--by utilization of non-married enrolled students; that of students accommodated as married; and other revenue-producing utilization. Also, the bedcount of unoccupied facilities is shown for non-married enrolled students and married students.

Table 6 displays, by institution, the distribution of Resident Assistant Bed Rental Waivers, total student occupancy, and the ratios of resident students to resident assistants. Because of an increase in unusual RA/Student ratios, they are now grouped into the following units/ranges: 2 to 1; 1 to 1 (the two most common ratios); .75 to .99; .6 to .74; and .5 or less.

Table 7 augments Table 6 and displays total resident student occupancy, the authorized range of bed rental waivers--from 4% to 6% of the total resident student occupancy--and the actual bed rental waivers used, in terms of bedcount and headcount (number of RA's). Finally, the resident student-to-resident assistant ratio is shown for each institution and as an overall ratio.

Tables 8 through 12 depict trends concerning utilization of residence hall facilities from Fall 1978 through Fall 1987:

Table 8, total utilization (headcount); Table 9, percent utilization; Table 10, non-revenue assignments; Table 11, revenue producing utilization for purposes other than resident student occupancy (bedcount); and Table 12, the ratio of students to Resident Assistants. The definitions over the ten year period are consistent with those described beginning on page xi.

SUMMARY OF DATA

In the Fall of 1987, the total current utilization of residence hall facilities (headcount) was reported to be 62,703. This level of occupancy represents an increase in actual total utilization (headcount) from the previous four years (see below and tables 1 and 8). The percent utilization (100.6) is also the largest increase since the Fall of 1982. The net revenue producing adjusted design capacity, however, decreased slightly to 62,313 (bedcount). This is largely a result of some changes in revenue status for facilities deemed inactive.

Summary of Utilization of Original Design Capacity of Residence Hall Facilities State-operated/funded Institutions, State University of New York Fall 1978 Through Fall 1987

Year	Original design capacity (bedcount)	Net revenue producing adjusted design capacity (bedcount)	Total utilization (headcount)	Percent utilization of net revenue producing adjusted design capacity
Fall 1978	66,569	61,095	63,283	103.6
Fall 1979	66,569	61,183	64,606	105.6
Fall 1980	66,569	61,192	66,003	106.6
Fall 1981	67,569	62,290	65,210	104.7
Fall 1982	67,965	62,484	65,132	104.2
Fall 1983	68,027	62,574	62,662	100.1
Fall 1984	68,431	62,746	61,554	98.1
Fall 1985	68,432	62,737	61,701	98.3
Fall 1986	68,432	62,488	61,506	98.4
Fall 1987	68,427	62,313	62,703	100.6

Of the total Fall 1987 headcount utilization, 61,891 (99%) was for resident student utilization.

The average number of students per resident assistant has remained relatively constant for the past ten years (see Tables 7 and 12).

Revenue producing utilization of residence halls for purposes other than resident student occupancy has increased from last year to 846. This bedcount is greater than those recorded in the past nine years. Previously, this bedcount had declined from 1,351 in Fall 1974 to a low of 112 in Fall 1979 (see Table 11).

The percent utilization of net revenue producing adjusted design capacity was reported as 100.6 percent in the Fall of 1987. This level of utilization represents the first year since the Fall of 1983 that there was more than 100% utilization. In the Fall of 1987, fourteen of the twenty-five institutions reported utilization of 100 percent or greater while six other institutions reported utilization ranging from 95.0 percent to 100 percent. Utilization at the four University Centers and at the six Colleges of Technology/Agricultural remains consistently high. Utilization at both institution types continues to be at an average of over 100 percent. In the Fall of 1987, the percent utilization for the University Centers was 101.1, while the percent utilization for the Colleges of Technology/Agricultural was 107.5. Fall 1987 data also reveal that the percent utilization of net revenue producing adjusted design capacity for the University Colleges is at its highest point since Fall 1982. The percent utilization at the University Colleges increased from 95.8 in the Fall of 1986 to 99.3 in the Fall of 1987. (see Tables 1 and 9).

Of the 25 institutions surveyed, facilities at 12 were under-utilized (showed a negative net utilization). Seven of these twelve, and two institutions whose facilities were over-utilized, were able to generate some amount of revenue through utilization other than student occupancy. Percent of revenue generated for "other utilizations" averaged 59.1% of standard rate revenue generation for nine institutions, with a high of 100% and a low of 8.8% (see Table 4).

DEFINITIONS

Residential Capacity Descriptors

BEDCOUNT--a unit of measure used to describe the capacity of the facility for residential purposes.

ORIGINAL DESIGN CAPACITY--the original residential capacity of the facility (expressed as BEDCOUNT*) as determined by architectural plans.

PERMANENT ADJUSTMENTS TO ORIGINAL DESIGN CAPACITY--permanent conversions of on-campus facilities which increase or decrease their residential capacity (expressed as BEDCOUNT).

NON-REVENUE ASSIGNMENTS--residential capacity (expressed as BEDCOUNT) exempted from revenue production for special uses such as for RESIDENT ASSISTANTS. These assignments are subject to annual review by Central Administration.

NET REVENUE PRODUCING ADJUSTED DESIGN CAPACITY--the capacity of the facility (expressed as BEDCOUNT) available for revenue producing uses. (ORIGINAL DESIGN CAPACITY, less NON-REVENUE ASSIGNMENTS, plus ADDITIONS TO ORIGINAL DESIGN.)

Actual Occupancy/Use Descriptors

HEADCOUNT--a measure of use which is the number of students or other persons occupying the facilities usually for residential purposes. Non-residential use of a facility, (e.g. office space) measured in terms of HEADCOUNT, is the number of students displaced by the use of the facility for other purposes.

RESIDENT STUDENT OCCUPANCY--the HEADCOUNT of enrolled students and their spouses who reside in residence hall facilities. (This excludes RESIDENT ASSISTANTS.)

RESIDENT ASSISTANTS--students assigned to and residing in residence hall facilities for the purpose of peer counseling and the betterment of the quality of life within the residence hall complex. The BEDCOUNT of facilities dedicated for RESIDENT ASSISTANT occupancy is exempted wholly or in part from revenue production.

OTHER USES--uses of residence hall facilities for non-residential purposes such as office space or classrooms, or for residential use by students from other colleges or special non-student residential occupancy.

---

*Terms in capital letters are defined elsewhere in the "DEFINITIONS".

Utilization Indices

PERCENT OF REVENUE GENERATED -- for revenue-producing other uses...the estimated percent of revenue which this use will yield compared to what it would yield for regular student use at the standard rate.

CURRENT UTILIZATION--the total actual utilization (expressed as HEADCOUNT*) of an occupied facility's available revenue producing capacity. This is the sum of total RESIDENT STUDENT OCCUPANCY and total OTHER USES.

NET UTILIZATION--the CURRENT UTILIZATION less NET REVENUE PRODUCING ADJUSTED DESIGN CAPACITY. This figure is negative (-) if the facility is under-utilized and positive (+) if the facility is over-utilized.

---

*Terms in capital letters are defined elsewhere in the "DEFINITIONS".

TABLE 3

Footnotes

[a]Excludes Empire State College, College of Environmental Science and Forestry, College of Optometry, College of Technology at Utica/Rome, and the Statutory Colleges.

[b]If headcount exceeds bedcount, the accommodation is over-utilized or "crowded". If bedcount exceeds headcount, the accommodation is under-utilized.

[c]Bedcount of completely unoccupied rooms, suites, or apartments.

[d]Includes rooms, suites, and apartments.

[e]Other types of accommodations, including space used as sleeping quarters not originally designed for that purpose, such as lounges and study areas where the adjusted design capacity bedcount is zero; and septuples and octuples with the appropriate adjusted design capacity bedcount.

[f]Consist of smaller rooms which, together, were designed as suites or apartments to accommodate six students.

[g]Consist of large rooms designed to house six students.

TABLE 4

Footnotes

[a]Excludes Empire State College, College of Environmental Science and Forestry, College of Optometry, College of Technology at Utica/Rome, and the Statutory Colleges.

[b]See the DEFINITIONS section for a description of "percent of revenue generated".

[c]Net Utilization is derived in Table I, and is displayed here to facilitate comparison between underutilization and amount of revenue-generating "other" utilization.

[d]For campus whose "other" utilization occurs in more than one category, a weighted average was used to determine percent of revenue generated. Total and subtotal percent columns are also weighted averages.

TABLE 5

Footnotes

[a]Excludes Empire State College, College of Environmental Science and Forestry, College of Optometry, College of Technology at Utica/Rome, and the Statutory Colleges.

[b]Rate shown is for one semester unless otherwise indicated. Rates are those current as of Fall 1987.

[c]Married students are billed in this case for the entire apartment (11 apartments total) at a semester rate of $2,460.00 regardless of the number of individuals occupying the apartment.

[d]These figures represent the rate per person per month.

[e]Married students are billed in this case for the entire apartment (4 apartments) at a semester rate of $1,650.00 regardless of the number of individuals occupying the apartment.

[f]Married students are billed in this case for the entire apartment (15 apartments) at a semester rate of $950.00 regardless of the number of individuals occupying the apartment.

[g]This "other revenue" use represents an estimated revenue generation of 8.8% of the total possible standard revenue at the $850 rate.

[h]This is the rate charged to freshmen students who were temporarily assigned to rooms in freshmen halls which had triple occupancy. This is for Fall 1987 only.

[i]This is a locally adopted rate for increased occupancy in the $958 rate room.

[j]This is a locally adopted rate for increased occupancy in the $887 rate room.

[k]This "other revenue" use represents an estimated annual revenue generation of 69% of the total possible standard revenue at the $887 rate during the academic year.

[l]Only temporarily unoccupied

[m]This figure is a reduced double or emergency triple room rate.

[n]This "other revenue" use represents a revenue generation of approximately 56.4% of an $850 rate.

[o]This figure represents a rate per semester per apartment, and assumes an occupancy of 4 people per apartment.

[p]This "other revenue" use represents a revenue generation of 53% of a $1750 annual rate.

88/33

TABLE 5 (CONTINUED)

Footnotes (Continued)

[q]Due to the inclusion of lounge utilization, eighty-eight (88) spaces are included as headcount at this rate.

[r]This "other revenue" use represents a revenue generation of 17% of a $1750 annual rate.

[s]This rate is designed for those individuals in a double room with triple occupancy beyond the mid-point of the semester.

[t]This "other revenue" use represents a revenue generation of 50% of the monthly revenue that would have been generated by resident student occupancy.

[u]The married students occupying apartments are billed monthly at this rate.

[v]The married students and staff occupying suites or apartments are billed monthly at this rate.

[w]These figures were equated to a semester basis. The Fall rates (shown here) are less than the Spring rates because charges are actually on a monthly basis. There are fewer months (4 mo.payable) in the Fall semester.

[x]This "other revenue" use represents a revenue generation of 57.1% of a $5,250 annual rate, which includes two semesters plus summer or the equivalent of three semesters, or 57.1% of a $1,750 standard semester rate.

TABLE 7

Footnotes

[a]Excludes Empire State College, College of Environmental Science and Forestry, College of Optometry, College of Technology at Utica/Rome, and the Statutory Colleges.

[b]The setting of guidelines for authorized bed rental waivers has been changed by the Central Staff Office of Student Services to a concept of an authorized range rather than an algorithm based on an RA factor. The range extends from 4% (low) to 6% (high) of the resident student occupancy (headcount). The resulting figures in these columns are thus measures of headcount.

[c]The students shown here as Resident Assistants have received whole or partial bed rental waivers as indicated by distribution of such waivers. These Resident Assistants perform a range of assignments which vary in type and degree of commitment. Therefore, the ratios shown here do not necessarily reflect differences in Resident Assistant services available to students.
